### Who are we?

The Cockburn Association (The Edinburgh Civic Trust) is an independent charity which relies on the support of its members to protect and enhance the amenity of Edinburgh. We have been working since 1875 to improve the built and natural environment of the city – for residents, visitors and workers alike.

We campaign to prevent inappropriate development in the City and to preserve the Green Belt, to promote sustainable development, restoration and high quality modern architecture. We are always happy to advise our members on issues relating to planning.

Your support enables us to organise city wide free events such as Doors Open Days, bringing together Edinburgh's communities in a celebration of our unique heritage.

All members of the Association receive an advance copy of the Doors Open Days programme and invitations throughout the year to lectures, talks and events.

If you are interested in joining the Association, visit us online at [www.cockburnassociation.org.uk](http://www.cockburnassociation.org.uk) or feel free to call or drop in to our offices at Trunk's Close.

## 86. Portobello Baptist Church

189-193 Portobello High  
Street, Portobello, EH15 1EU

Sat 10:00 - 16:00

Portobello Baptist Church is celebrating its centenary of using the building which was the first Portobello Town Hall (opened 1868) and was built on the site of Puerto Bello House which was the first dwelling in the area. The building was designed by David Bryce (who also designed Fettes College and the original Edinburgh Infirmary). The building was also used as a dance hall, a cinema and hosted soirées before becoming a church. The church hall was originally from the Devil's Porridge site in Greta where munitions were assembled during WWI. After the war, the huts were disassembled and sold.

**Global Connections:** Puerto Bello in Panama was where the sailor who built Puerto Bello House had fought, returning to the Edinburgh Area to reside. His home was on the London to Edinburgh Stagecoach route so he provided refreshments. The fish wives of Musselburgh would also stop off on their way to and from market in Edinburgh.

Our church congregation of about 60 adults and 26 children comes from 10 nations - definitely "global connections".

## 107. Barnton Quarry Restoration Project (Cold War Bunker)

35 Clermiston Road North,  
EH4 7BN

Sat 10:00 – 16:00

Sun 10:00 – 16:00

During WWII, Barnton Quarry was the home of the RAF sector operations centre for the Turnhouse Sector of 13 Group, RAF Fighter Command. From this building, Radar returns from German aircraft were triangulated and RAF fighter attacks were coordinated. After WWII, the site was developed into a Cold War Radar centre with the addition of a large underground bunker. The site is currently under restoration, but the RAF operations room of the surface WWII SOC will be open to the public.

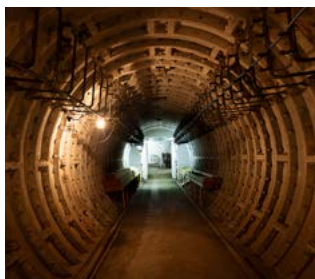

**Global Connections:** Global Connections, albeit negative ones, are the entire reason for this facility. Initially set up due to the fear of Nazi bombing during the Second World War, the facility was greatly extended and repurposed in the early 1950s to counter the emerging Cold War threat.

**Activities:** Information boards, numerous photographs, slideshows and the restoration group volunteers will share the history of the site.

Due to the active restoration public access is limited to the Ops Well but you will be able to see into the variety of rooms off this area, giving a sense of how extensive this building, and indeed the project as a whole, is.

Disabled parking available.

Corstorphine,  
EH12 7HD

Sat 10:00 – 15:00

The Sanctuary is 'a hidden gem' of 1960's Architecture, designed by Sir William Kininmonth (1904-1988). The striking square plan and plain white windowless exterior allow the Sanctuary to float above ground - acknowledging the influence of Le Corbusier's Chapel at Ronchamp. The interior creates drama, interpreting the 'Covenanting Conventicle Church' by its hollowed out form 'with the surrounding sweeping' terraces' of seating. It is an uplifting and simultaneously peaceful building with daylight from the innovative inverted clerestory perimeter allowing the ceiling to float within the balanced square worship plan.

**Global Connections:** The design of the Church was strongly influenced by European design; current connections include Missionary Partners in Kenya - strong links to Malawi Underprivileged Mothers (MUMs) and continuing contacts with Ministers and members from and living overseas.

This B-listed doocot is one of the earliest surviving Scottish examples from the 16th century, built by George Hepburn whose son was the founder and first colonel of the Royal Scots.

Known as a lectern doocot, it is a rectangular structure with lean-to south facing roof and entry holes for pigeons down the slope.

In 1996, the doocot was restored and converted into an interpretative centre where visitors can enjoy an audio-visual dramatization of the traditional origins of Scotland's flag.

**Global Connections:** Audio-visual show in 7 languages (English, Gaelic, French, German, Polish, Spanish and Italian)
