

**STANDING UP FOR
WHAT WE STAND ON**

**EDINBURGH
CLIMATE
COALITION**

THE COP SUMMIT HAS NOT BROUGHT ABOUT ANY SIGNIFICANT ACTION TO TACKLE CLIMATE WARMING...

despite huge numbers showing support for change. COP planned to limit global warming to a 1.5c increase, but we already stand at a 1.2c increase and can see the impact of increasingly frequent floods, fires and storms. **Exceeding 1.5c will expose 2 billion people to heat stress, crop failures and water scarcity.** Politicians are using energy price rises and the war in Ukraine to justify new oil fields and fracking, even though it is now cheaper to produce renewable energy.

KEEP THE OIL IN THE SOIL

Insulating our homes would greatly reduce emissions and cut expensive heating bills. Politicians are not addressing the urgency of the climate crisis, how it impacts nature and damages the quality of life for all. Do something for our shared future and stay in touch. **Join the Edinburgh Climate Coalition!**

SYSTEM CHANGE NOT CLIMATE CHANGE!
